A map of Africa showing the distribution of 12 species of the genus *Acanthaceae*. The map is color-coded to represent different species or groups of species. The colors used are dark blue, orange, yellow, red, and light grey. The distribution is concentrated in the western and southern regions of the continent, with a notable cluster in the south-western part of Africa (including South Africa, Lesotho, and Swaziland) and another cluster in the west (including Senegal, Gambia, Guinea, Sierra Leone, and Liberia). The rest of the continent is shown in light grey, indicating no recorded distribution for these species.
